

Wood procurement policy

Nordic Paper can sell FSC and PEFC certified products. To meet the requirements of FSC and PEFC the procurement of wood and chips needs to ensure that it does not originate from any of the following:

- Wood harvested illegally
- Wood harvested in violation of traditional and human rights
- Wood harvested in forests in which high conservation values (HCVs) are threatened by management activities
- Wood harvested in forests being converted to plantations or non-forest use
- Wood from forests in which genetically-modified trees are planted
- Wood that originates from unacceptable sources according to PEFC
- In conclusion, the wood and the chips must be verified with a low or negligible risk of being, in any way, contrary to the requirements of both FSC and PEFC
